Now exclusively available at Specialty Fitness Equipment! Special discounted pricing you can not get online! IN STOCK NOW!

The JAWKU Muscle Blaster V2 Cordless Percussion Massage Gun was developed to assist the body's own healing mechanisms. With variable 5 speed settings, you can choose different frequencies amplitudes and torque according to your muscle needs. With vibration frequency and scientific design, the Muscle Blaster body massager increases blood flow, releases stored lactic acid, and relieves sore muscles. Though Muscle Blaster massages in various vibrations, it still assures silent operation thanks to its noise reduction technology.
